

# Keeping Interactive Notebooks in Science

## The Right Side

Interactive notebooks will be used in class daily to help you learn and remember important science concepts. The right-side notebook page contains the information you put into the notebook and the information you need to learn—the INPUT.

### What goes on the right side?

INPUT goes on the right side! Input is all the information that you are supposed to learn. Some examples of input include the following:

- Notes from a lecture or guest speaker
- Text or other source
- Vocabulary words
- Video and film notes
- Procedures
- Readings
- Questions and answers
- Sample problems

### The Keys to Fantastic Right Sides

- Right sides have **ODD** numbered pages. Always start the page with the date and title at the top of the page.
- The right page is for writing down information you are given in class. Use Cornell notes for lecture, discussion, text, sample problems, etc. Write up your study questions ASAP.
- Write legibly. Use highlighting and color to make important information stand out.
- Write summaries at the bottom of each page of notes to reduce the amount of information you have to study.

### Costa's Levels of Thinking

<b>Level 3</b>	Apply Judge	Evaluate Predict	Hypothesize Speculate	Imagine
<b>Level 2</b>	Analyze Infer	Compare Sequence	Contrast Synthesize	Group
<b>Level 1</b>	Define Name	Describe Observe	Identify Recite	List Scan
